AGS-55 DOWNHOLE PARAFFIN TREATMENT

PRODUCT DESCRIPTION

AGS-55 is designed to be used in the following application, down-hole treatment in oil wells where paraffin and asphaltenes accumulate and AGS-55 is effective in liquefying those paraffins and asphaltenes to clear tubing, rods, and artificial lift equipment. Due to the active ingredients in the AGS-55 it will liquefy paraffin in down-hole oil wells without movement or circulation inside the wellbore. The AGS-55 will stop the need to performing hot oil treatments in the well bore which over time makes the paraffin more difficult to continue to treat with hot oil effectively. The consistent treatment to treating the oil well with AGS-55 will make the production output of the oil well more predictable and easier to keep the flow of oil produced by the well. Currently, conventional manual removal of crude oil bottoms is costly, hazardous, and time consuming often creating environmental and safety challenges. This results in difficulties in inventory, operations, and even procurement staffing.

PRODUCT BENEFITS

- Liquefies paraffin (milk shake consistency)
- Liquefies paraffin (hard pan consistency)
- Minimizes hot oil treatments
- Ensures more production from a well per year
- Decreases costs to maintain oil wells

APPLICATIONS

AGS-55 is a chemical used in oil wells to liquefy paraffin and asphaltenes that are considered to be milk shake consistency and hard pan consistency. This product will minimize re-stimulating exercises like acid treatments and hot oil treatments.

HAZARDS

"Empty" containers retain residue (liquid and/or vapor) and can be dangerous. Do not pressure, cut weld, braze, solder drill, grind or expose such containers to heat, flame, sparks or other sources of ignition. "Empty;" ' drums should be completely drained, properly bunged, and promptly returned to a drum re-conditioner. Avoid prolonged contact with skin and frequently change soiled clothing. In case of contact, wash thoroughly with soap and water for 15 minutes or until the irritation subsides. The formation of mists should be avoided. Do not take internally. If swallowed, do not induce vomiting. Call physician or Poison Control Center immediately. Keep out of reach of children. Not recommended for "breathing air" or hydrocarbon oils.

Blended and packaged in a
registered facility.

TECHNICAL DATA

TEST PROCEDURE

RESULTS (TYPICAL)

Stock Code	AGS-55	
ISO VG	D2422	N/A
Viscosity 100°C, cSt	D445	N/A
Viscosity 40°C, cSt	D445	N/A
Viscosity 100°F, SUS	D445	85
Viscosity 210°F, SUS	D445	N/A
Auto-ignition temperature	D2270	>430°F
Specific Gravity (g/ml)	D1298	0.740
Density, (lb./gal)	D1298	6.18
Color	D1500	Clear
Flash Point, °C (°F) (COC)	D92	-7.78(18)
Fire Point, °C (°F) (COC)	D92	N/A
Pour Point °C (°F)	D97	N/A
Odor		Mild
Texture		N/A
